

NOTICE ** WATER MAIN REPLACEMENT PROJECT *** NOTICE**

June 3, 2008

Dear Residents of Spurwink Road, Scarborough:

Beginning later this week Maietta Construction, Inc. of Scarborough and their subcontractor, Thirsty-Turf Irrigation of Portland, will begin the process of replacing the water main in Spurwink Road from Pleasant Hill Road southerly to #99 Spurwink Road for the Portland Water District. The contractor will also be installing new 1-inch copper service lines from the new water main to the street line at #101 and #103 Spurwink Road and connecting them to the existing building service line at the edge of the right-of-way. The existing service lines at #100, #105, #111 and #115 will be connected to the new water main. (The line from the shutoff valve at the street right-of-way line to your home remains the property owner's responsibility.)

To maintain your water service during the project, a temporary above-ground service line will be installed to your residence. This temporary line is typically connected to the internal plumbing system through an outside faucet (hose bib), if available. If you have an outside hose bib, please make sure it is functional and accessible. If you do not have an outside hose bib, an alternative connection arrangement will have to be made in order to maintain your water service. The District's field representative and the contractor will be happy to work with you to make the necessary connection.

The work is expected to take two to three weeks. We will try to minimize any inconveniences you may experience during the main replacement project. If we need to interrupt your water service for any reason (excluding emergency situations), we will provide you with a minimum of 48-hours advance notice.

This project is important for us to maintain adequate water quality and service in your area. We appreciate your cooperation. Should you have any questions or comments, please contact me at the number or email below.

Sincerely yours,

Frank H. Meader
Utility Engineering Coordinator
