

NOTICE ** WATER MAIN REPLACEMENT PROJECT *** NOTICE**

June 3, 2010

Dear Residents of Old County Road and Kimball Drive:

R. J. Grondin & Sons, Inc., the same contractor working for the Town of Scarborough in your neighborhood on the Old County Road reconstruction project, will soon begin the process of replacing a section of the water main in Old County Road for the Portland Water District. The contractor will also be installing new service lines from the new water main to the street right-of-way line in front of Old County Road properties where they will be connected to the existing service lines. (The service line from the street right-of-way line to the building remains the property owner's responsibility.)

To maintain water service to all customers on Old County Road and Kimball Drive during the project, temporary water lines will be run along the side of the street with an above-ground service line installed to each house. This temporary line is typically connected to the internal plumbing system through an outside faucet (hose bib), if available. If you have an outside hose bib, please make sure it is functional and accessible. If you do not have an outside hose bib, an alternative connection arrangement will have to be made in order to maintain your water service. The District's field representative and the contractor will be happy to work with you to make the necessary connection.

The work is expected to take about a month to complete. We will try to minimize any inconveniences you may experience during the main replacement project. (One inconvenience we may not be able to avoid is running the temporary water main across the end of your driveway. A ramp will be created on both sides of the line, allowing you to drive over it, if it is necessary to cross your driveway.) If we need to interrupt your water service for any reason (excluding emergency situations), we will provide you with a minimum of 48-hours advance notice.

This project is important for us to maintain adequate water quality and service in your area. We appreciate your cooperation. Should you have any questions or comments, please contact me at the number or email below.

Sincerely yours,

William E. Pierce, P.E.
