

**NOTICE \*\*\* WATER MAIN REPLACEMENT PROJECT \*\*\* NOTICE**

April 1, 2021

D & C Construction will be replacing the water main in Main and Depot Streets for the Portland Water District. The contractor will also be installing a new service line from the new water main to your property line where it will be connected to your existing service line.

To maintain water service during the project, a temporary water main will be installed along the side of the street. A temporary service line will be connected from this main to the internal plumbing system either through an outside plumbing connection at the building or a deep connection to your existing service near the street. The District's field representative and the contractor will work with you to make the necessary connections.

The water main construction is scheduled to begin the week of April 5<sup>th</sup> and will be installed in conjunction with PWD and the Town's wastewater work. We will try to minimize any inconveniences you may experience during the main replacement project. If we need to interrupt your water service for any reason (excluding emergency situations), we will provide you with a minimum of 48-hours advance notice.

This project is important for us to maintain adequate water quality and service in your area. We appreciate your cooperation. Should you have any questions, please contact me at the number or email below.

Sincerely yours,

Helen Newman, P.E.  
Project Engineer
