

2024

SEBAGO LAKE *to* CASCO BAY CALENDAR

PHOTO: BARBARA O'CONNELL, CASCO BAY

INTRODUCING the Sebago Lake to Casco Bay Calendar

The Portland Water District draws water from Sebago Lake, disinfects it, and delivers it to hundreds of thousands of people. Then, we collect, treat, and return clean water into the Presumpscot River or Casco Bay. We are the stewards of each of these water droplets as they travel from Sebago Lake to Casco Bay.

Starting in 2024, that is the theme of our annual calendar. The Sebago Lake to Casco Bay calendar still includes picturesque photos of Sebago Lake and also showcases iconic images of Presumpscot River and Casco Bay.

Please send us photos:

Sebago Lake Region

Please continue to submit photos of Sebago Lake and the tributaries that drain to it. Your photo must include an image of the lake or one of its tributaries.

Presumpscot River

The Presumpscot River is the outlet of Sebago Lake and also the receiving river of the Westbrook/Gorham Regional Wastewater Treatment Facility, so we are committed to helping keep it clean. Your photo must include the river.

Casco Bay

PWD is also committed to protecting Casco Bay. Casco Bay receives water from the East End Wastewater Treatment Facility, as well as wastewater treatment facilities on Peaks Island and in Cape Elizabeth. Please submit photos of Casco Bay in the Portland Water District service area of Falmouth, Cumberland, Portland (including the islands), South Portland, and Cape Elizabeth. Your photos must include water.

The Sebago Lake to Casco Bay calendar will be published by year-end. You are invited to share your photos for consideration. Once submitted, a committee of Portland Water District staff will review and select photos based on many variables.

Submission requirements:

- Each photographer may submit a maximum of FIVE unique photos a year. Each photo may only be submitted once overall.
- Deadline for 2025 calendar: August 31, 2024.
- High resolution photos only: minimum of 1 MB (equivalent to 1024 KB).
Must be at this setting when the photo is taken. Photo resolution cannot be adjusted after it is taken. The internet provides many resources for setting cameras for high resolution photos.
- Digital photos preferred. Please email to sebagolake@pwd.org.
- Send uncropped, rectangular photos with a horizontal orientation. Vertical and square photos do not fit in the calendar layout.
- Photos must not be altered after they are taken (by color enhancement, filters, etc.).
- Photographs must include Sebago Lake, a tributary of Sebago Lake, the Presumpscot River, or Casco Bay in them somewhere.
- When you send your submission, please include:
 1. Your name
 2. Email address
 3. Age (if under 21)
 4. Month/time of year photo was taken
 5. Location of photo
- By providing photos, you agree to allow PWD to use them in the calendar and other materials. You will be credited when possible.

Send submissions to sebagolake@pwd.org

** Note: The PWD email system permits email attachments of up to 30 MB. If you are sending several photos, please email them in batches so the maximum attachment size is not exceeded.*

Songo Lock, constructed in 1830, is the last surviving lock of the Cumberland and Oxford Canal, a 19th-century canal in southern Maine. The lock is located on the Songo River, just above its confluence with the Crooked River at the northern end of Sebago Lake State Park in the town of Naples. It allows boats to navigate between Long Pond and Brandy Pond at higher elevation to Sebago Lake at lower elevation.

PORTLAND WATER DISTRICT

From Sebago Lake to Casco Bay

Portland Water District's mission is to protect public health, safety, and the environment by providing our customers first-class water, wastewater, and related services.

Sebago Lake provides one-sixth of Maine's population with reliable and safe water. PWD protects this precious resource through various activities and programs including land conservation. One of our partners is Sebago Clean Waters, whose mission is to preserve 25% of the land that drains to Sebago Lake.

PWD also operates four wastewater treatment facilities that clean and disinfect wastewater before returning it to the Presumpscot River and Casco Bay.

Sebago Lake

The deepest lake in Maine, Sebago Lake supplies drinking water to over 200,000 customers, or about 17% of Maine's population

Lower Bay Protection Zones

Zones around the water intake pipes restrict access by boaters and swimmers to protect water quality

Sebago Lake Water Treatment Facility

PWD disinfects and distributes an average of 22 million gallons of drinking water daily

Presumpscot River

Wastewater treated at one of our wastewater treatment facilities is returned to the Presumpscot River, Sebago Lake's major outlet

Portland Water District

Portland Water District was chartered in 1908 and is headquartered at 225 Douglass Street in Portland

Distribution System

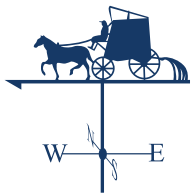

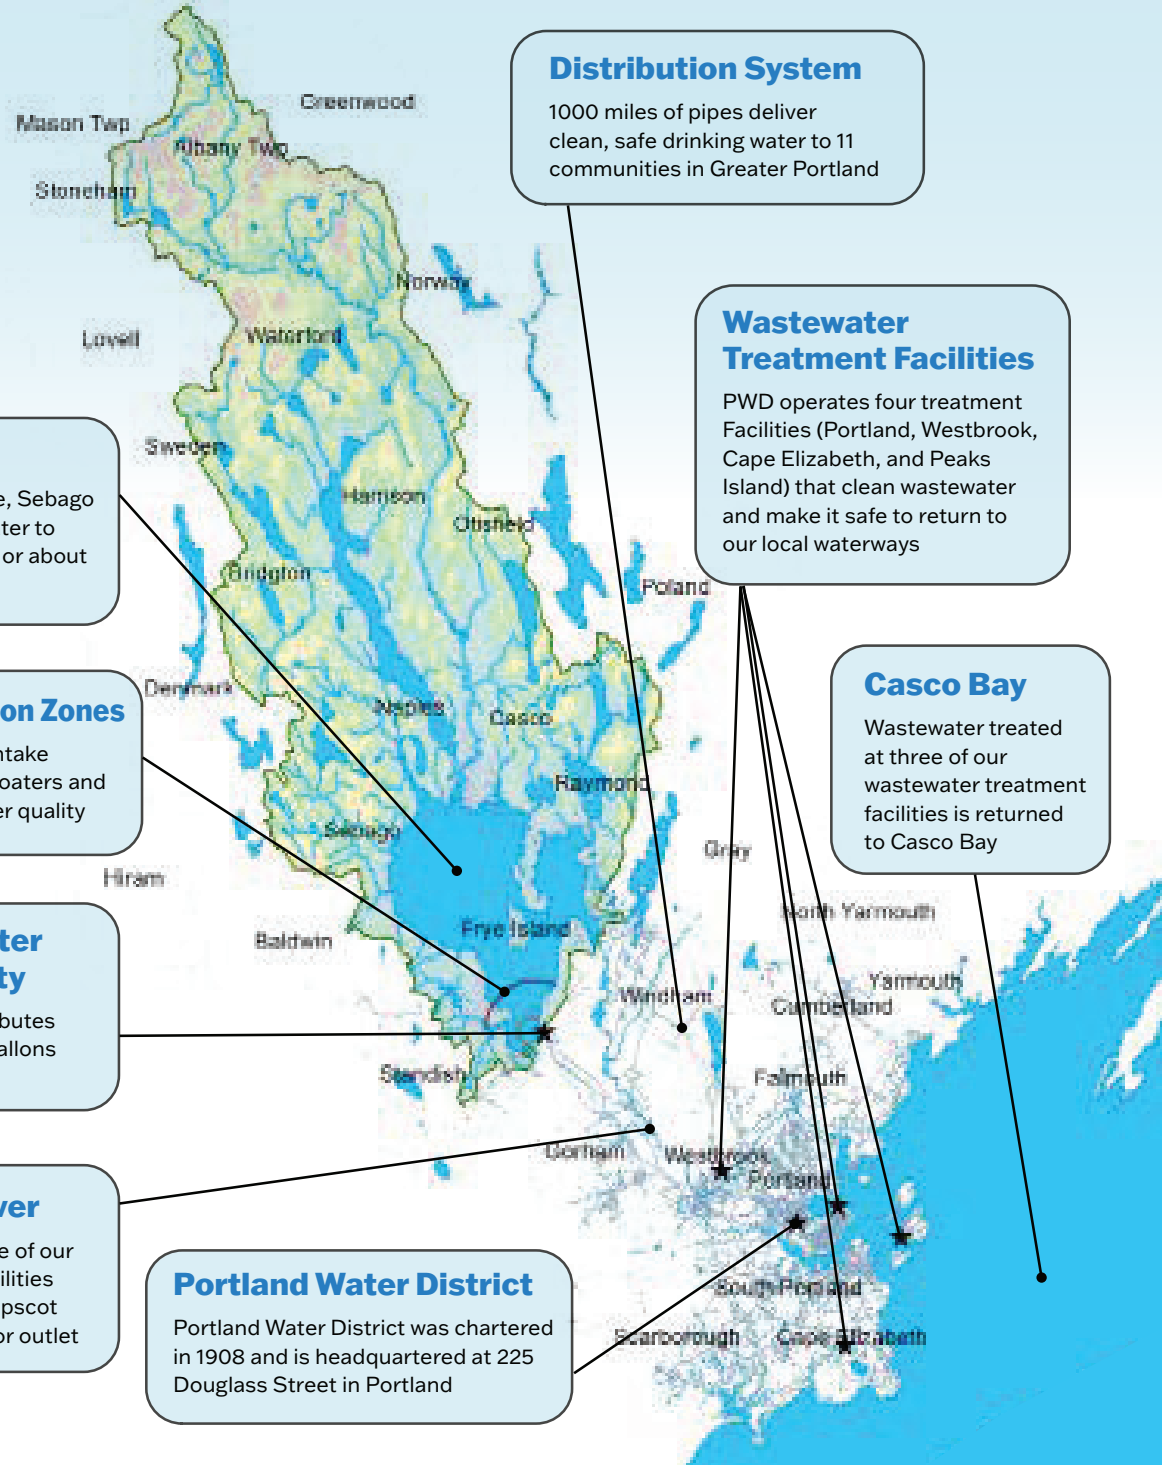

1000 miles of pipes deliver clean, safe drinking water to 11 communities in Greater Portland

Wastewater Treatment Facilities

PWD operates four treatment Facilities (Portland, Westbrook, Cape Elizabeth, and Peaks Island) that clean wastewater and make it safe to return to our local waterways

Casco Bay

Wastewater treated at three of our wastewater treatment facilities is returned to Casco Bay
