Water Bottle Filling Station!

A better way to hydrate.

The Portland Water District awards grants to fund the cost of water bottle filling stations for organizations within our service area.
See inside for details.

Quick • Clean • Green

The Portland Water District awards grants for the purchase of water bottle filling stations. Receive up to \$5,000 for an outside fountain, \$2,000 for an inside unit, and \$650 for retrofits. Interested organizations should complete the online application at www.pwd.org. Deadline for applying is October 31. Grant recipients will be notified by December 31 and have nine months to install the unit.

In 2022 trustees increased funding for the grant program.
Since inception, we have awarded 32 grants.

Water bottle filling stations offer features that traditional fountains & bottled water lack.

- Convenient option to quickly fill your bottle without spills and splashing.
- Reduction in the waste generated from using disposable water bottles.
- Filling a bottle with fresh, clean and clear tap water is the most affordable way to stay hydrated.
- Green Counters which display the number of disposable water bottles that have been saved from landfills by using the unit.
- Built-in sensors that activate the flow of water for a touch-free, sanitary operation.
